

Outstanding renovation gives old home a stunning second chance

QUALITY product, great client communication, local staff and suppliers – that is the winning combination used by PTF Construction to obtain a fantastic end result – each time, every time.

With more than 20 years experience in the building industry, Principal Paul Farthing relocated to Hervey Bay four years ago for a sea change.

He has since built a great reputation for PTF Constructions in the Fraser Coast region, employing eight local carpenters and an apprentice.

PTF Constructions is the second arm of the multi-award winning company in Brisbane.

The company has won numerous awards for their renovation and remodelling projects in Brisbane and, closer to home, for the improvement of the Scarness Streetscape.

Their nomination into this year's awards is a family home that was relocated from Hervey Bay to Takura.

It was raised, built in and transformed into a five bedroom home with an office and expansive deck to enjoy the view of

surrounding bushland.

With energy efficiency in mind, the home was especially designed to catch the natural breezes passing through the fragrant eucalyptus trees on the property.

Its key features include:

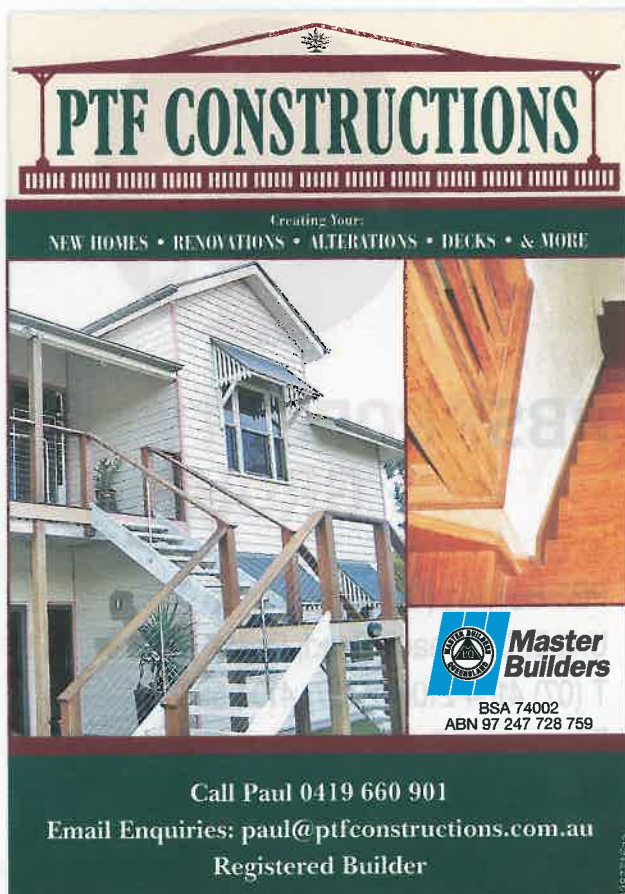

- Stone kitchen bench tops
- Polished Hardwood Flooring through out
- Strategic energy efficient window placement
- Oversize master bedroom and ensuite
- Innovative Laundry chute
- Staircase storage
- Energy efficient lighting plan

Key sub contractors and suppliers:

- Howard Saw Mill, Howard – Hardwood
- Murray Barnett Plumbing, Maryborough – Plumbing
- Wayne Kruger Electrical, Hervey Bay – Lighting and Electrical
- Denmead Designs, Hervey Bay – Architect
- Touch Wood Flooring
