

We engaged PTF constructions to do an extensive renovation on our 1890's workers cottage, which was our first major build. Right from the beginning of the process Paul communicated effectively and patiently with us and educated us through each new learning curve. He kept to our agreed timelines and worked closely with us on maintaining our budget without sacrificing quality. When challenges arose, he dealt with them efficiently and professionally, sourcing new suppliers or contractors to fulfil the particular requirements of our build if needed. If we had a query Paul seemed to be able to find answers immediately as behind the scenes, Tobi kept the administration of the build tightly organised! Pauls' team on site were always helpful and kept the site tidy for our numerous visits with kids in tow. We would highly recommend him as a quality builder to work with.

Winning the Master Builders Award Award was testimony to their workmanship. We are very proud for them and very proud of our beautiful home.
